

Team 7 meeting minutes

Project: Web-based Language Scavenger Hunt Game

Meeting Date: Tuesday 22 September

Next Meeting: Wednesday 23 September

Attendees: Gamuchirai Mhere, Ashish Nayak, Dan Rukundo

Action Items – Due before Sunday Sept 27

#	Task	Detail
1	Further review milestone 1 and milestone 2 functional requirements	Make final tweaks to the requirements
2	Look at the requirements and decide our preference	Look at the requirements in both milestones and pick which we love the most
3	Brainstorm more additional features	do research on what special features to add, using google, ai, or any other resource
4	specify the levels of difficulty differences	what's unique to each level, figure out how each level shall add difficulty

Agenda for Wednesday Sept 23 meeting

1. Final review on the functional requirements and test cases
2. Discuss any further additional features
3. Assign team members to the different functional requirements

4. Open collaboration on the system architectural design

Meeting summary

- We discussed the functional requirements from both milestones and talked about special features we could add such as timing
- We looked at examples of system architecture designs, DFD level 0, and DFD level 1
- We did a general review of the proposal
- We looked at platforms to collaborate on drawings such as drawio.com, we also talked about other tools we could use.
