Team 7 - Meeting Minutes

Project: Web-Based Language Scavenger Hunt Game (Lost In Translation!)
Meeting Date: Tuesday, November 3
Next Meeting: TBD (no class Thursday, November 5; reading break next week)
Attendees: Gamuchirai Mhere, Madiba Burks Magara, Ashish Nayak, Dan Rukundo

Agenda

Split up the remaining Milestone 1 tasks, decide what the demo needs to show, and check the class and demo schedule.

Discussion

- **Store and profile icons:** The store depends on profile icons, so Ashish's icon work should go first (Gamu redeems icons, Ashish puts them in). For Milestone 1, only a few basic icons (around 3) are needed. Ashish will make a file like the badges file with lots of icons to add later. Gamu's part is the backend logic for turning points into things you can redeem and unlocking icons.
- **Badges and points:** Gamu already finished the badges backend and will now build the badges frontend so students can see which badges they can unlock. Dan will build the frontend for points.
- **Student page:** The student page still needs "choose language" and "choose difficulty". Difficulty belongs to Dan since it matches the levels feature (Basic, Advanced, Expert).
- **Teacher and admin dashboards:** Gamu will build the frontend for teachers to assign hunts and for students to see those hunts on their class dashboard. Ashish's "teachers add audio and locations" feature is also an admin function. Teacher versions come first, since that's what matters for the demo, and the admin version comes in a later PR. The admin dashboard will mostly reuse components from Madiba's teacher dashboard, plus a few admin-only endpoints. Madiba will take it.
- **Workload:** Everyone checked they have about 3 tasks, or at least enough for the milestone. If someone has too much, the team can do what they did before:
  Post-hunt debrief: Unclear how this would work without AI. A simple version could give general feedback, e.g. if a student got everything wrong on floor 300, suggest reviewing numbers above 300. Madiba will look into it, and if it's too much the team will drop it and pick something else. Dan suggested letting students skip a level after 3 failed tries as an alternative task.
- **Reading break:** Ashish has a list of things to refactor during reading break. The team will also fix things and make small tweaks.
- **Schedule:** No class this Thursday, since the instructor is away at an award ceremony. Demos are after reading break.

Action Items — Due Before the Milestone 1 Demo (after reading break)

#	Task	Details	Assignee

1	**Basic profile icons**	Add about 3 basic profile icons for Milestone 1, plus a file (like the badges file) with more icons to add later. Also store which icon a student has equipped.	Ashish
2	**Teachers add audio and locations**	Let teachers add audio clips and locations. Teacher version first, admin version in a later PR.	Ashish
3	**Redeeming points backend (#156)**	Backend logic for spending points on profile icons. Not enough points shows "insufficient points" and the balance stays the same.	Gamu
4	**Store to redeem points (#192)**	Frontend store where students browse prizes and redeem points.	Gamu
5	**Badges page (#190)**	Frontend showing which badges a student has earned and which are still locked.	Gamu
6	**Teacher-assigned hunts (#191)**	Frontend for teachers to assign hunts, and for students to see assigned hunts on their class dashboard.	Gamu
7	**Difficulty levels**	Add Basic (numbers only), Advanced (numbers + description) and Expert (description only) levels, plus choosing a difficulty on the student page.	Dan

8	**Points frontend**	Show the student's points, updating after each location.	Dan
9	**Leaderboard**	Class leaderboard where students see their points compared to classmates.	Madiba
10	**Admin dashboard**	Admin version of the dashboard, reusing teacher dashboard components plus a few admin-only endpoints.	Madiba
11	**Look into post-hunt debrief**	Check if a simple debrief can be done without AI. If it's too much, drop it and pick another task.	Madiba
12	**Confirm Thursday schedule**	Message the TA/instructor to check whether check-ins are cancelled too.	Dan

Notes

- No class Thursday, November 5. Dan will confirm with the TA/instructor whether check-ins are also cancelled.
- Milestone 1 demos are after reading break, so the demo should show the teacher side first.
- Ashish may leave "teacher can reassign their class code" for a later PR if there's time.
- The proposal lists the post-hunt debrief and skip-level features under Dan. The debrief is now being looked into by Madiba, and skip-level is a backup option.
- Still open on the Kanban from last week: #150 Pause/Resume Session (Ashish), #172 Teacher dashboard and #174 Class roster (Madiba).
