

Team Vision and Goals

- To make a great project we can showcase on our individual portfolios
- To graduate with a good grade
- To have a good experience working together as a team and foster good relationships

Communication

- We have decided to use Discord as our communication platform

Meeting Times

- Saturday afternoon and Tuesday evenings via Discord.
- Tuesdays and Thursdays in-person quick meetings at class time.
- Additional meeting times will be organized as required by team members.

Conflict Resolution

- When an issue arises, the issue will be brought to the team's attention through discord. We will bring up the issue in our next internal meeting time to try and resolve it. If a resolution is found it will be documented, if not, the issue will be escalated to Dr. Hui.
- If a member is not completing a task in time or falling behind, a team member will raise the issue to the group chat and the team will discuss how to improve, shift responsibilities, or raise it to Dr. Hui.

Distribution and Quality of Work

- Work will be evenly distributed by team members. If a feature or assigned work becomes too much for one member, the member will raise the issue to the group chat and the team will reassign tasks.
- Work will be high quality, reviewed by team members, structured for maintainability and scalability.
- Progress of tasks will be discussed frequently in meetings and group chats, tasks will also be tracked and visible through the github kanban board.

Statement on commitment to avoid inappropriate behavior

- Bad behavior is not accepted
- Teammates will be respectful to each other and avoid use of harmful and disrespectful language

Engagement during the meeting

- When someone is speaking, other teammates must listen actively

Team 7 - Madiba, Gamu, Dan, Ashish (Web-based Scavenger Hunt Game)

- Every teammate will be allowed an opportunity to speak

Punctuality and general attendance

- Meetings will be attended timely, and communication on absence or late coming will be made prior to the meeting

Preparedness before arriving for the meeting

- Goals and expectations from everyone will be made in the previous meeting, otherwise good explanation is required for lack of preparedness

Minutes

- Minutes will be recorded every meeting to ensure we have decisions, issues and progress tracked
- We will use Fireflies.ai to help us record minutes during our meetings
